

## REGISTRO BACKEND - SEMANA 09

Testando APIs no Postman com códigos completos:

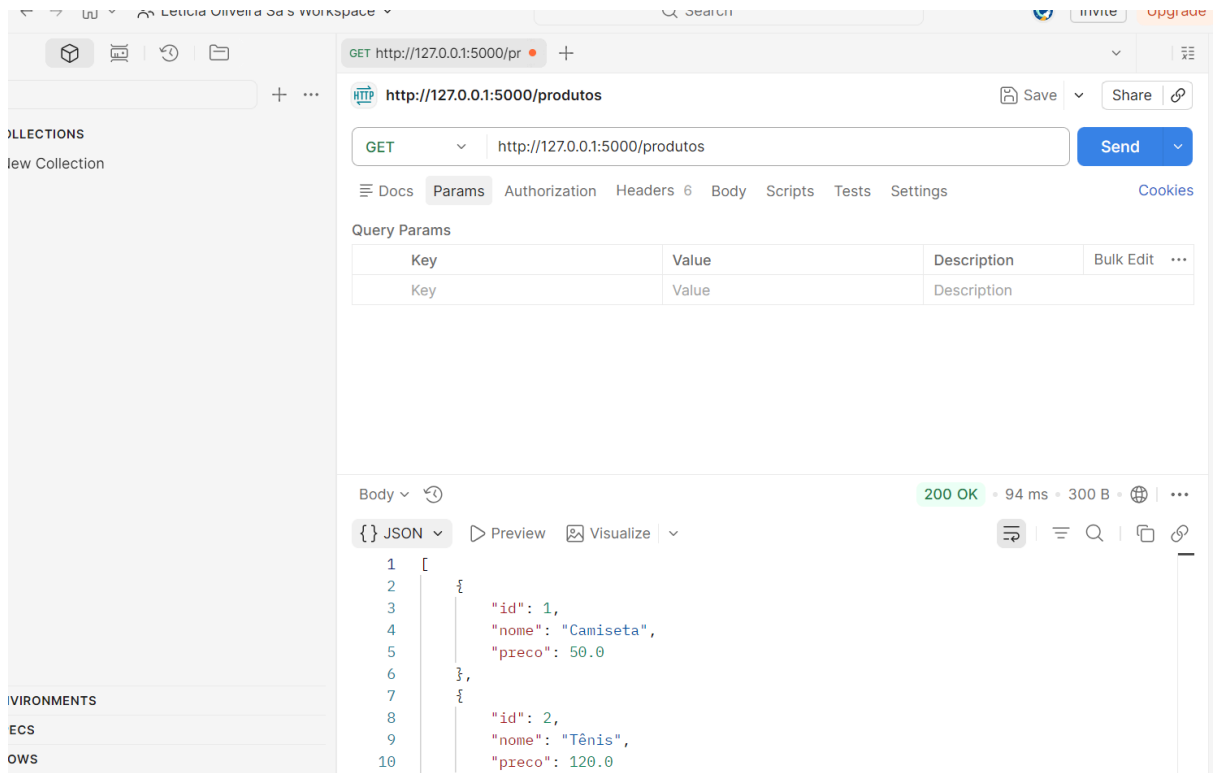

The image shows a VS Code editor with three files: `api_rest.py`, `api_graphql.py`, and `api_jwt.py`. The `api_graphql.py` file is open, showing the following code:

```
95 class AtualizarProduto(graphene.Mutation):
148
149
150
151 # Mutation para remover produto
152
153 class RemoverProduto(graphene.Mutation):
154
155     class Arguments:
156
157         id = graphene.Int(required=True)
158
159
160
161     mensagem = graphene.String()
```

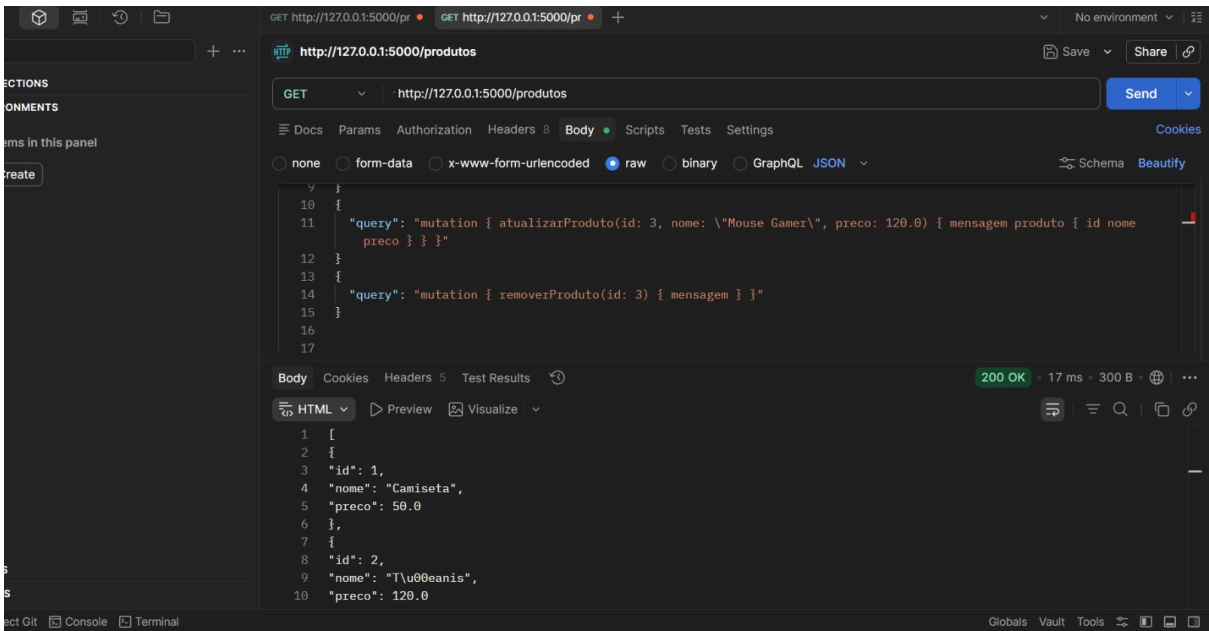

The terminal window at the bottom shows the command `py api_jwt.py` being executed. The output is:

```
PS C:\Users\LeticiaOliveiraSa\Desktop\atividade_api> py api_jwt.py
* Serving Flask app 'api_jwt'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 595-075-528
```
