

REGISTRO DE VERSIONAMENTO - SEMANA 15

Auditoria de Histórico e Recuperação de Arquivos (Terminal do Vscode):

The screenshot displays the Visual Studio Code (VS Code) interface with a dark theme. The Explorer sidebar on the left shows a project named 'MODULO-PRONTUARIO' with files '.gitignore', 'dosagem.js', and 'layout.css'. The main editor area has two tabs: 'dosagem.js' and 'layout.css'. The 'dosagem.js' tab is active, showing a JavaScript function:

```
1 function calcularDosagem() {  
2   console.log("Cálculo incorreto");  
3 }  
4 calcularDosagem();
```

Below the editor is a panel with tabs for PROBLEMS, OUTPUT, DEBUG CONSOLE, and TERMINAL. The TERMINAL tab is active, showing a PowerShell session with the following commands and output:

```
PS C:\Users\Lucas\Desktop\modulo-prontuario> git commit -m "chore: remove arquivo de layout"  
On branch master  
nothing to commit, working tree clean  
PS C:\Users\Lucas\Desktop\modulo-prontuario> git log --oneline  
db9e4cd (HEAD -> master) refactor: altera função de dosagem  
eb93c9a adiciona layout inicial  
65d83fa feat: implementa calculo bade de dosagem  
5dce393 chore:adiciona regras do gitignore  
PS C:\Users\Lucas\Desktop\modulo-prontuario>
```

On the right side of the interface is a CHAT panel. It features a 'Build with Agent' button and a text input field with the placeholder 'Describe what to build'. Below the input field are buttons for '+ Agent', 'Modes', and 'Default approvals'. The status bar at the bottom indicates the current file is 'dosagem.js' at line 4, column 19, with 4 spaces and UTF-8 encoding.
